## Electric vehicles for Luxury Hotels and Resorts

BROCHURE  
SECTOR

# Electric vehicles for luxury hotels and resorts

Using a Zallys vehicle in hotels and tourist facilities can really make a difference in carrying out activities that require the movement of materials, such as refilling drinks and food, moving waste bins and linen trolleys, managing luggage and much more.

# TR30

**300 kg**  
Load capacity

**5,5 km/h**  
Max. speed

**30%**  
Max. slope

**8 h**  
Autonomy

The compact yet high-capacity **TR30** electric transporter helps **transport a variety of materials**, from **beverage crates** to **guest luggage**. It is the versatile solution for speeding up and at the same time making the transport of heavy loads in hotels safer, **eliminating manual handling** of loads and **preventing risks** related to overload of physical effort by hotel staff.

The engines of Zallys vehicles are 100% electric with zero emissions, they respect the environment and are extremely silent; these characteristics allow them to be used both outdoors and in closed spaces.

For a more ecological waste management!

# M5

**4.000 kg**  
Tow capacity

**5,5 km/h**  
Max. speed

**15%**  
Max. slope

**8 h**  
Autonomy

**M5** with the new lever hook represents the new frontier of efficiency in **waste management**: quickly connect the bin to the machine and take it effortlessly to the designated collection point. Particularly **suitable for hotel parking lots**, where slopes often make it difficult to move loads. Thanks to **M5**, a single operator can **transport waste bins up hills** quickly and without physical effort, maximizing the efficiency and safety of operations and allowing staff to invest more time in important activities. Furthermore, tow trucks like **M5** are useful for towing **laundry trolleys**, **refrigerator trolleys** and **food trolleys**, making the management of preparation and organization operations more agile.

... the passion for moving

## The handling specialists

**Zallys** is a manufacturer of **electric movers** for various branches of industry including logistics, construction and distribution chains, but also airports, hospitals and much more. For more than **25 years** we have been present on the international market with a network of over **60 distributors worldwide**. The experience in designing and manufacturing professional electric vehicles has made **Zallys** a leading company in the sector, capable of satisfying any need related to the movement of wheeled loads and the transport of goods or people.
